

WORLD FIRST

REVOLUTIONAL HIGH-TECH

Anti-rotational **ROSI**[®] Implants

- Oval and conical like a root and thus non-rotational
- No bone loss, since no thread
- Minimizing the danger of periimplantitis
- No destruction of thin, labial bone plate
- Very short remodeling phase - faster osseointegration
- Faster prosthetic possible
- Perfect molding and impression
- Immediate implant placement always possible
- Clear and easy to use system
- 1-piece-system available in PEEK, thus free of allergies
- Clear and easy to use system
- Little or no labor costs
- Only one surgical operation necessary

>>> Very comfortable for patient, practitioner and technician
